

Portable FLAG-Extender Assembly # S-22

For assembly
video (57sec):

- 1 x Base
- 1 x Flag pole parts in aluminium (top-and bottom) + a pole connector
- 1 x Flexible carbon-fiber FLAG-Extender rod
- 1 x Flag with pockets for the system

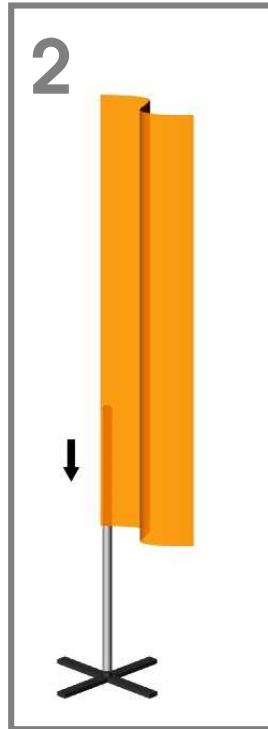

1

Top pole part only!

Place the top flag-pole part (with the black top) in the base.

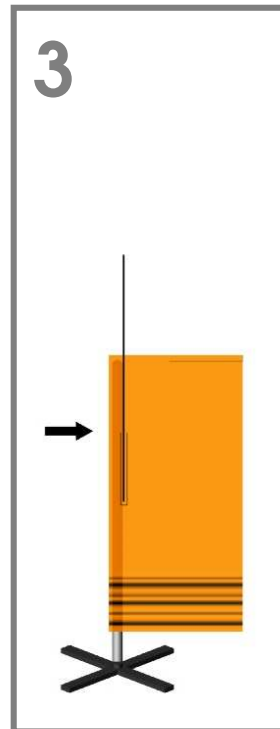

The bottom flag-pole part is connected later see (6)

2

There is a sleeve all along the vertical edge of the flag.

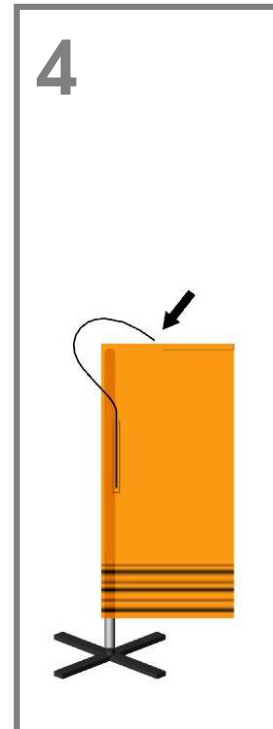

Pull the flag down the pole - all the way to the end of the sleeve.

3

There is a long thin pocket on the vertical edge of the flag.

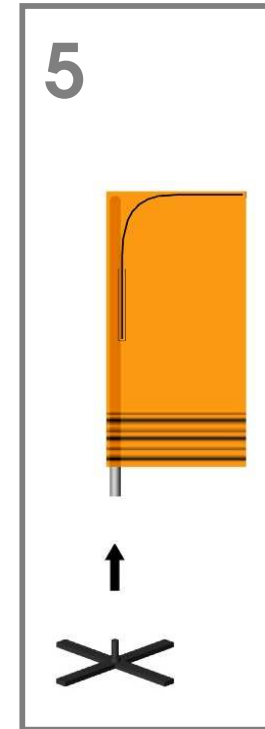

Push one end of the flexible FLAG-Extender rod to the bottom of the pocket.

4

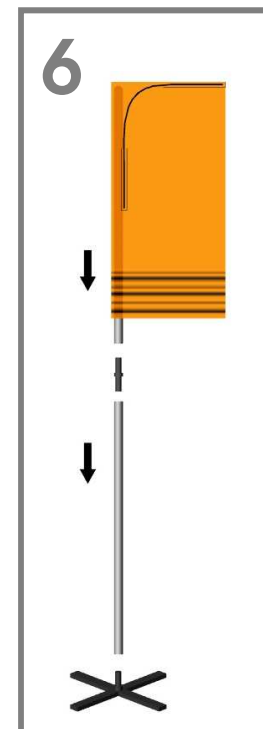

On the top edge of the flag there is another long thin pocket.

Grab the free end of the flexible rod, bend the rod and push it to the bottom of the pocket.

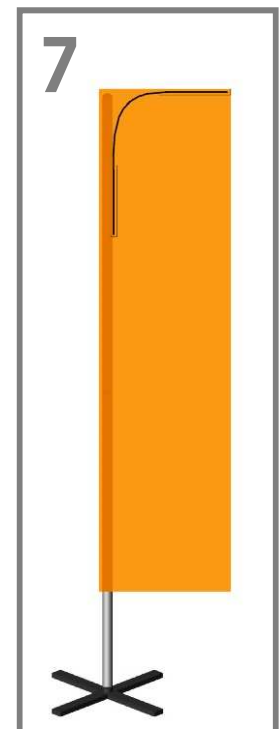

5

Lift the top flag-pole part off the base together with the flag.

6

Connect the bottom flag-pole part.

7

Pull the flag down over the bottom flag-pole part.

You are done 😊
